## Postcard

*Create a postcard*

*Postcards are designed to share an experience. They generally have an image on the front that reflects an idea, location or appealing graphic. On the back is a message from the sender. They are posted to the audience.*

*Things to consider when designing a postcard:*

*\*The image on the front must appeal to the audience and has to relate to the message included.*

*\*The message needs to be concise but cover all important points.*

*\*Remember to leave room on the back for an address and stamp.*
