WebPage

Create a WebPage

A webpage is an online site that allows you to share content with the rest of the world. Webpages can be created using free online programs. Listed are some examples.

*1: **Google Sites** is an easy way to create a free website. Google Sites allows you to access the information in your own drive, while also giving you a single user logon.*

*2: **Weebly** is a user-friendly free web builder for students. It provides you with a simple drag and drop interface with many premade templates. It will require you to create an account.*

*3: **Wix** is a user-friendly free web builder, complete with stunning template that can be easily customised. Wix website builder requires no coding skills. It will require you to create an account.*
