

COMBINE PROCESS

Combine

To combine, is to bring all the facts, skills, understanding related to the concept together and start making connection between the knowledge, while prioritising important facts and skills.

Using the prioritised knowledge to

Collate and Plan what is needed to solve the big question.

Clarify

In the **CLARIFY** stage you created a **Big Question**. The **Big Question** is now a filter for the information you will use from the **CONNECT** Stage. When looking at the information you have gathered in this stage (**COMBINE**) use the **Big Question** to keep you on track. It is easy to become of task by following an interesting concept or topic that may not help you solve your **Big Question**. Staying on track is the hardest part of the **COMBINE** stage. If you find yourself of task always go back to the **Big Question**.
