## Slide Show

*Create an online Slide Show*

*Slide show apps, for example, Google Slides or Microsoft PowerPoint, enable you to create a slide show of your ideas. These slides can be accessible anywhere you have access to the internet. Slide show apps allow you to insert images, videos, music text, hyperlinks, links and transition features. Slide show apps also have templates to help create professional presentations.*

*Tip: Make sure your slides are as simple as possible. Slides are just a support to your story. They are not the whole story.*
